Fleet work doesn't wait for a desk

Fleet managers are not always seated behind a computer. Vehicles move, routes change and important events can happen wherever the working day takes them.

The challenges this creates:

- ◆ **Vehicle information** may be needed away from the office
- ◆ **Delayed visibility** can slow operational decisions
- ◆ **Important alerts** require timely attention
- ◆ **Managers need an easier way** to check vehicles and trips
- ◆ **Fleet responsibilities** continue beyond the desktop

Your clients need fleet visibility that moves with them.

Your fleet in your pocket

The 3Dtracking Fleet Management App is the mobile extension of the platform, available through the Apple App Store and Google Play Store.

Your clients see where their vehicles are, move between units and reach the information they need without returning to a desk.

See

Live vehicle locations, status and fleet movement on the map.

Understand

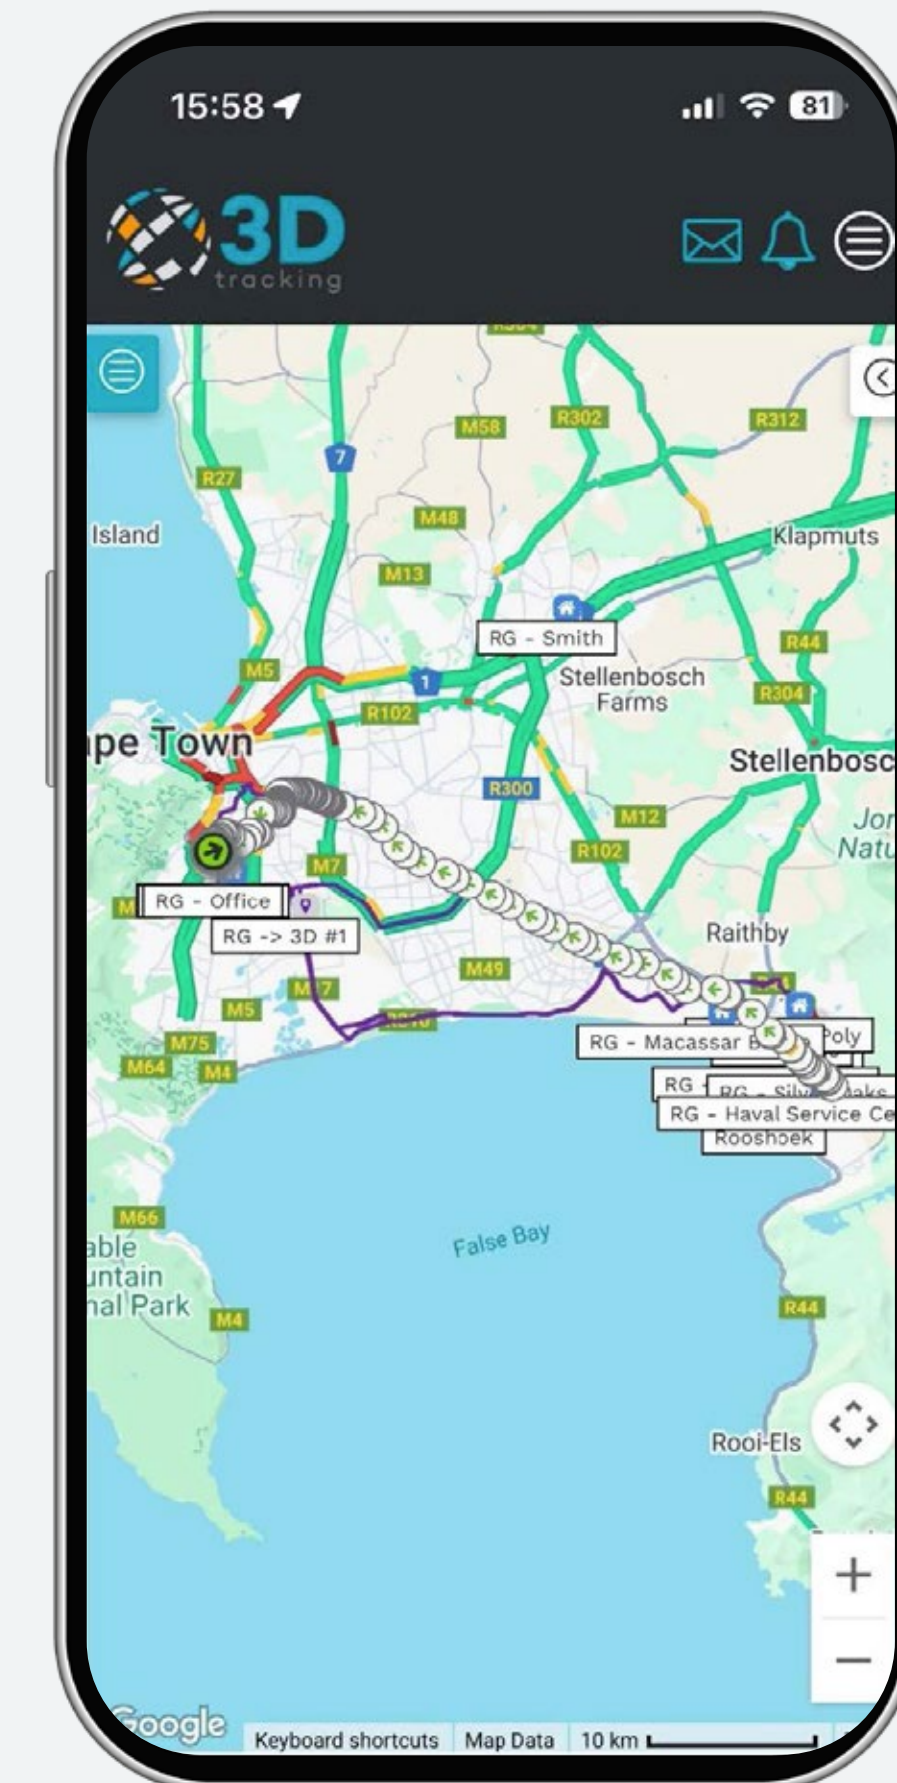

Trip history, routes and driver behaviour events.

Respond

Alerts, dispatch activity and available remote commands.

Manage

Vehicle, driver and system information wherever they are.

Live tracking on the map

Trip history – times and addresses

Alert - Oil Change alert

Alert Type:

Odometer Alert (recurring)

Name:

Oil Change alert

Vehicle:

Jaguar E-Pace (RG)

Alert detail – what happened, and to which vehicle

From insight to action

Trip history explains what has already happened.

Alerts tell your clients what needs attention now.

- ◆ **Review** previous trips and routes
- ◆ **Connect** activity to specific vehicles and drivers
- ◆ **See driving events** such as speeding, harsh braking and rapid acceleration
- ◆ **Examine fleet activity** while away from the office

Alert received

A fleet event reaches the manager on their phone.

Event reviewed

They check the vehicle, location and relevant detail.

Action taken

Dispatch activity and available remote commands.

Clear information, and the ability to act on it without waiting.

Your app. Your brand.

Make the Fleet Management App part of your own offering with flexible white-labelling options.

Your look

Apply your logo and brand colours within the app.

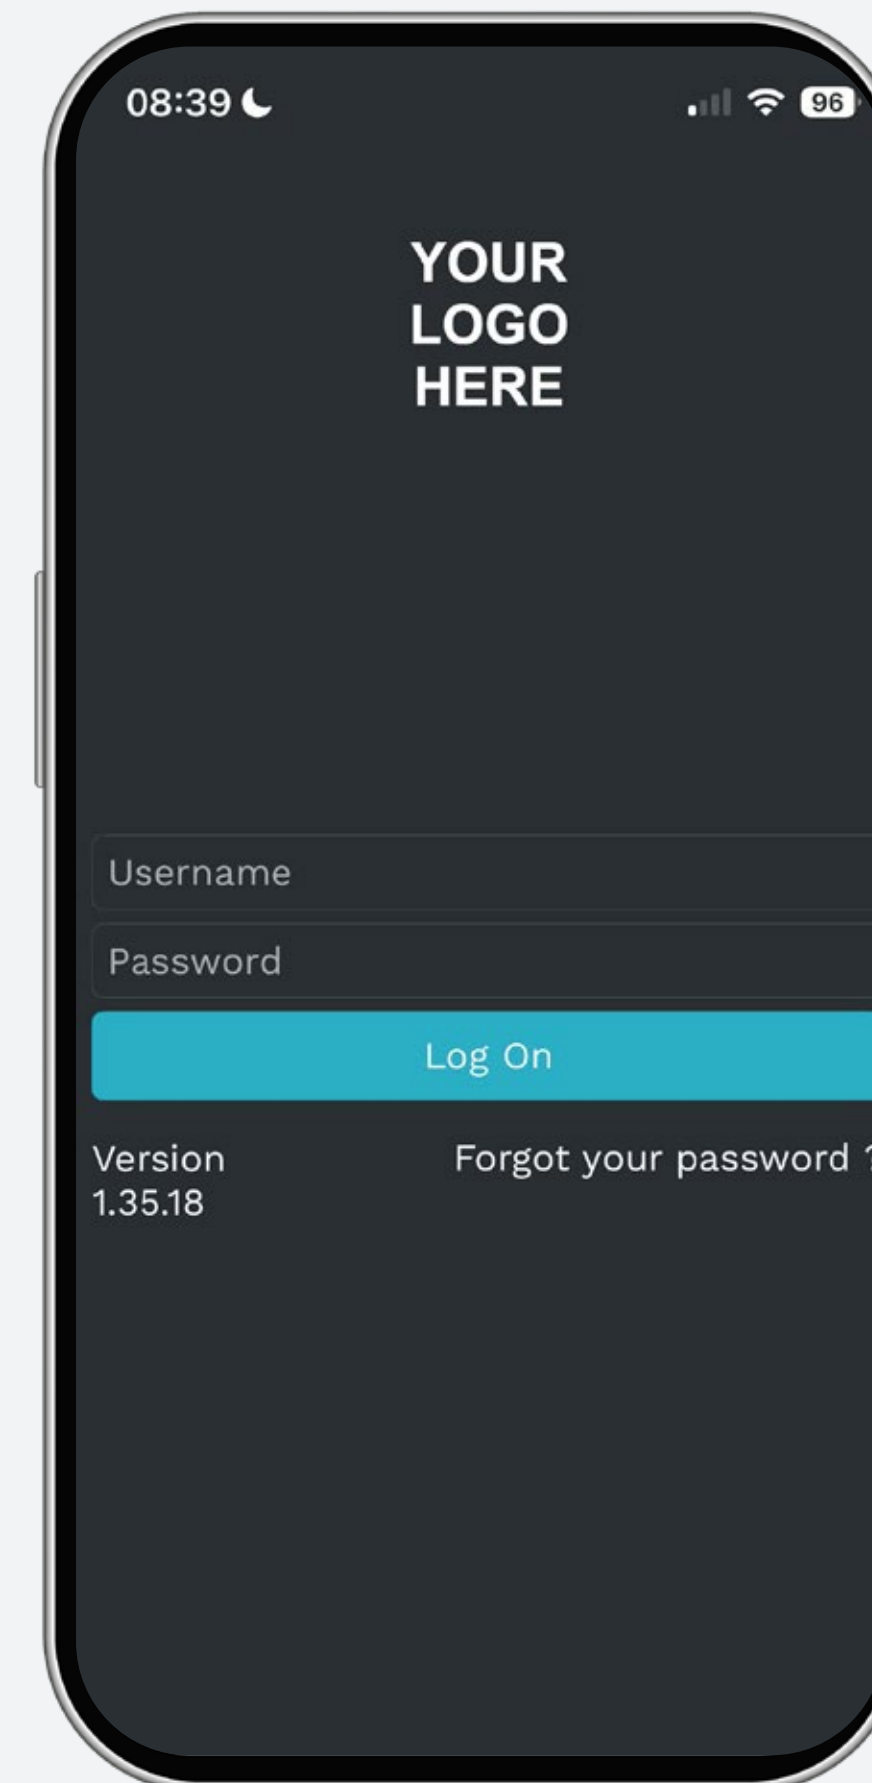

Your presence

Trip history, routes and driver behaviour events.

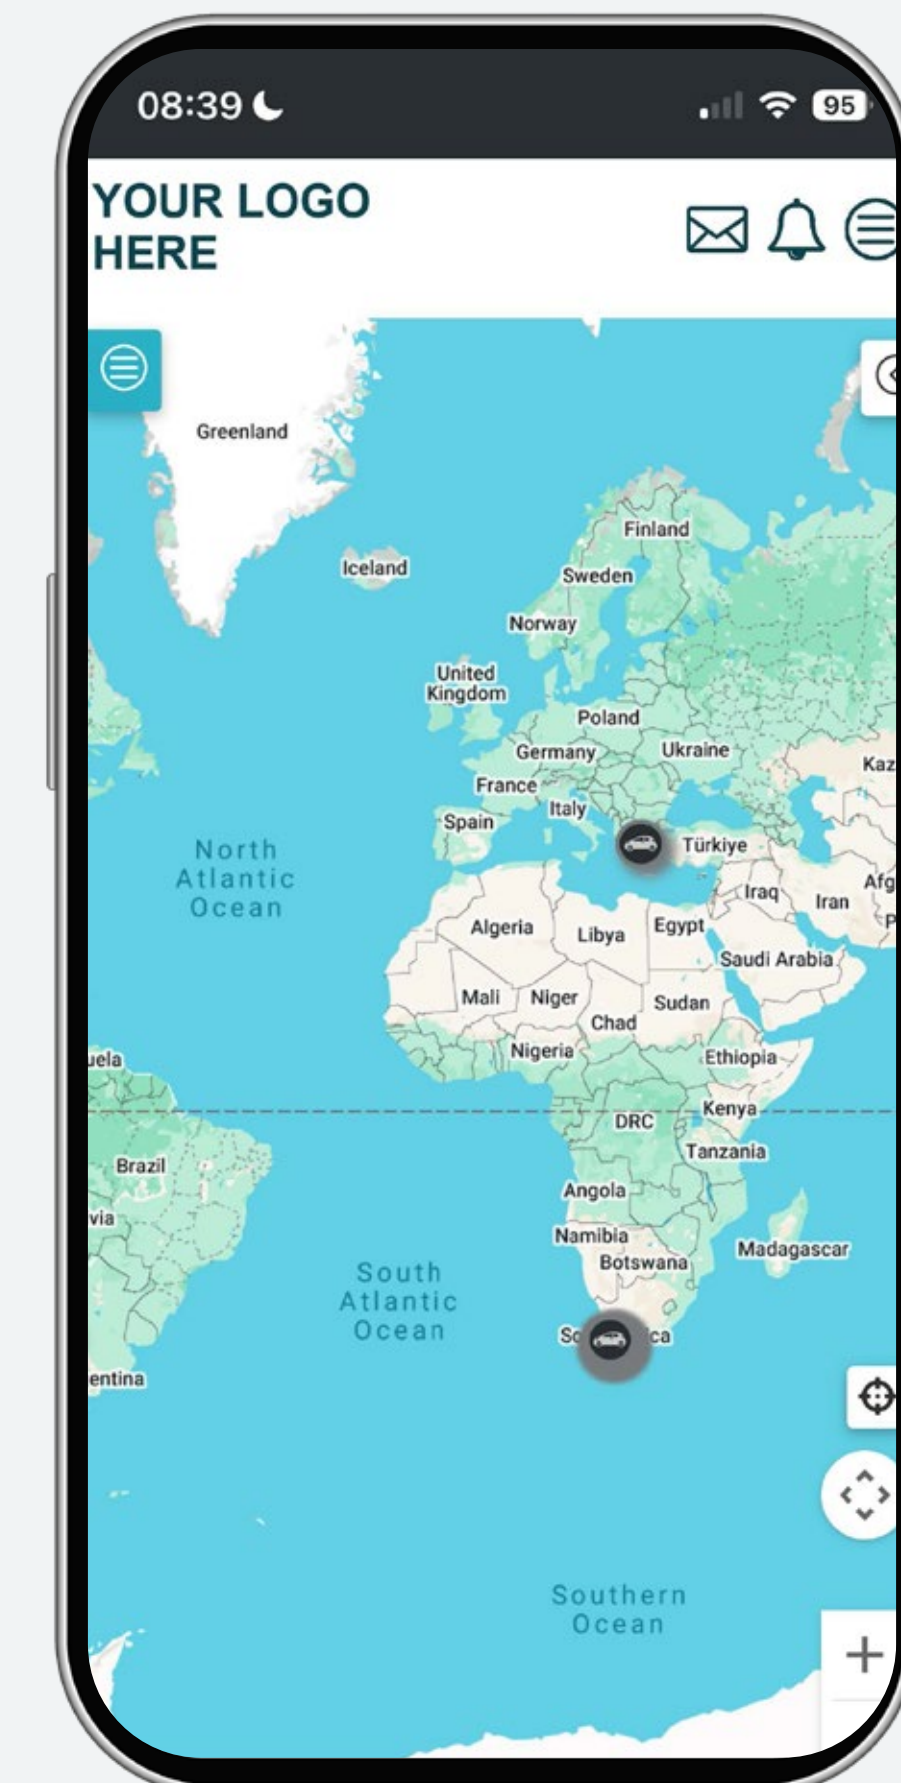

Your relationship

Alerts, dispatch activity and available remote commands.

Your clients see your brand. We provide the technology behind it.

Use Case: Adding mobile to a partner's offering

A telematics provider serving mixed commercial fleets across two regions.

The Challenge

Clients kept asking for fleet visibility on their phones, but building and maintaining an app of their own was slow and costly.

How the app helped

- ◆ Launched the app under its own brand, with no development of its own
- ◆ Applied its logo and colour scheme inside the app
- ◆ Gave clients live tracking and trip history on their phones
- ◆ Ensured alerts reached fleet managers away from the desk

The Result

The provider added mobile access to its offering in weeks rather than months, and its brand now reaches clients every time they check their fleet.

Mobile capability, without the cost of building it.

Global Telematics,
Just Easier

One platform. Multiple solutions.

The Fleet Management App forms part of a broader telematics platform that can support more of your clients' needs as they evolve.

Choose the solutions your market needs today and add more as you grow:

- ◆ **Live** vehicle tracking
- ◆ **Fuel** management
- ◆ **Driver** behaviour monitoring
- ◆ **Video** telematics
- ◆ **Fleet** maintenance
- ◆ **Reports** and custom alerts

Expand your offering while delivering one consistent experience under your brand.

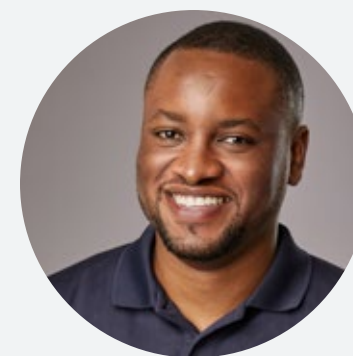

Global Telematics,
Just Easier

Fleet management wherever your clients go

"Our mobile app gives you, our partners, the flexibility to grow by strengthening your offering to your clients"

Henri Kisimba

Head of Key Account Management

Fleet information made easier to check. Important actions made easier to take. Wherever the working day leads.
